Application of planer shape comparison to object retrieval in image databases		E,J,P				
Automatic Estimation and Removal of Noise from a Single Image				H,O		
Biometrics: A grand Challenge				A,R		
Collaboration between statistical and structural approaches for old handwritten characters recognition	K, R					
Color image segmentation based on homogram thresholding and region merging				C,L	x	x
Corner detection and curve segmentation by multiresolution chain-code linking			L,N	B,E	x	x
Curve Parameterization by Moments	C,L	B	E,K			
Dissimilarity between two skeletal trees in a context			A,D, P,R,T			
Document image analysis: A primer	H,O	Q				
Efficient region segmentation on compressed gray images using quadtree and shading representation	I, N, Q		Q,S		x	x
Face Detection in color Images	A, S		G		x	x
Fast template matching algorithm for contour images based on its chain coded description applied for human face identification				F,M		
Feature selection based on the training set manipulation	B,E					
Fingerprint Image Reconstruction from Standard Templates				T		
Flycatcher: Fusion of Gaze with Hierarchical Image Segmentation for Robust Object Detection	J, P				x	x
From image analysis to computer vision: motives, methods, and milestones, 1955-1979		D,T			x	x
Generic Model Abstraction from Examples		O,H				
Increasing the discrimination power of the co-occurrence matrix-based features	D, T	F,M	H,O			
Laplacian Operator-Based Edge Detectors				J,P		
Measuring the Orientability of Shapes		C,L	B,F			
Object detection by global contour shape			I			
Parametric estimation of affine deformations of planar shapes	F,M					
Review of shape representation and description techniques	G	N,S		I,G,S	x	x
Robust Image Segmentation Using Resampling and Shape Constraints				N,Q		
Seam Carving for Content-Aware Image Resizing		A,G,I				
Shock graphs and shape matching		R,K				
Sketched Symbol Recognition using Zernike Moments				D,K		
Statistical Pattern Recognition: A Review			J		x
